

## GENERAL FEEDBACK

- ☐ When I click out of a box, the box needs to closed

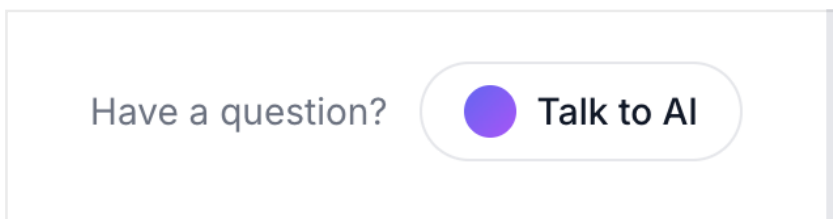

## SPECIFIC FEEDBACK

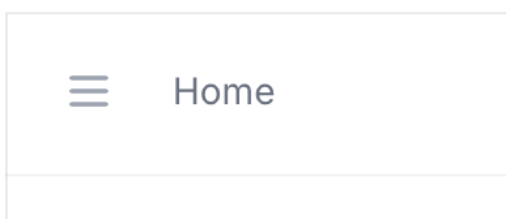

- ☐ Change this to workspaces
- ☐ Main font for ui and other things - roboto + variants

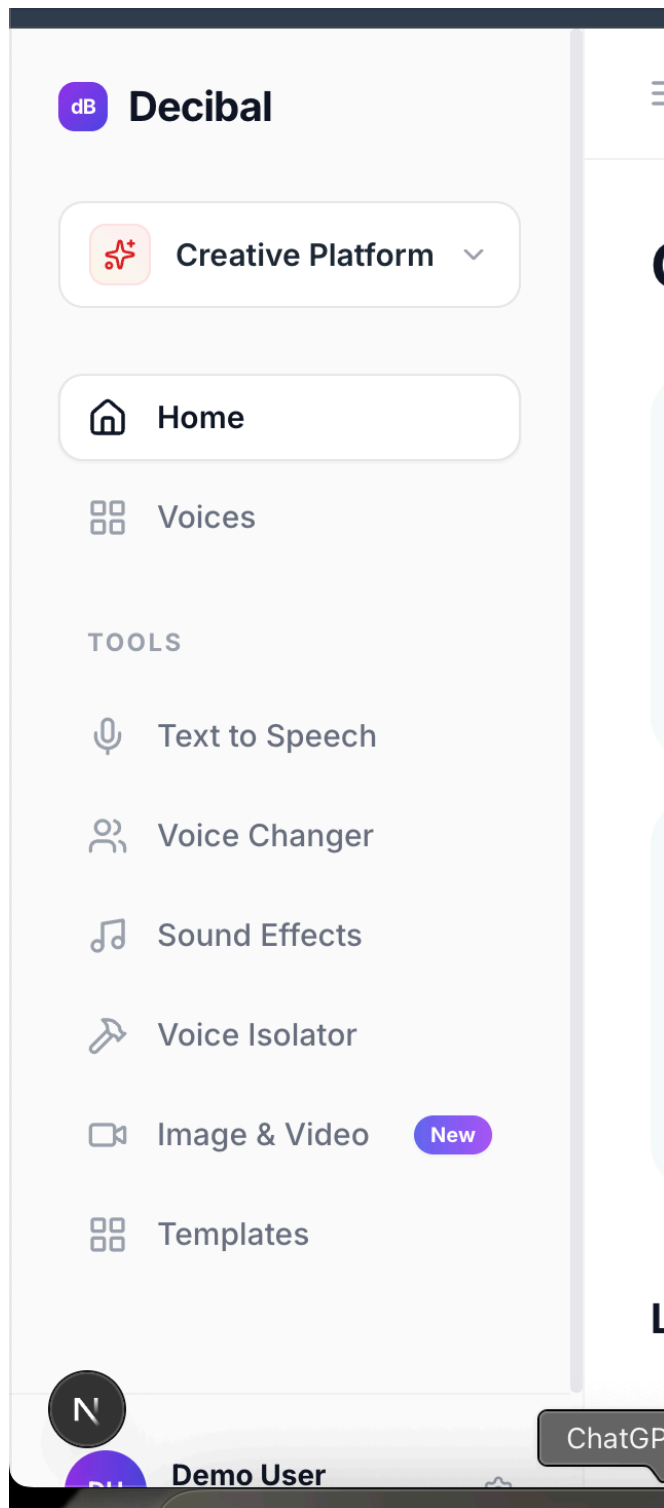

Remove all 3 buttons here

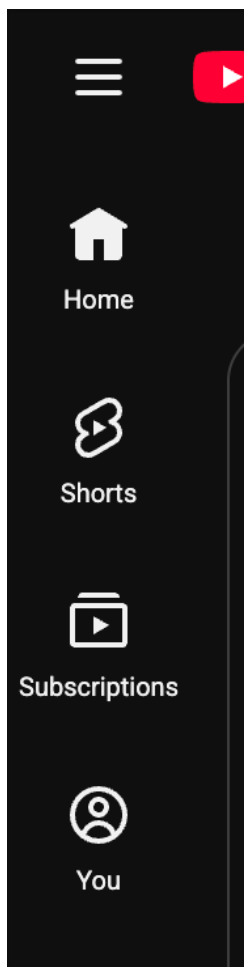

Remove this as well

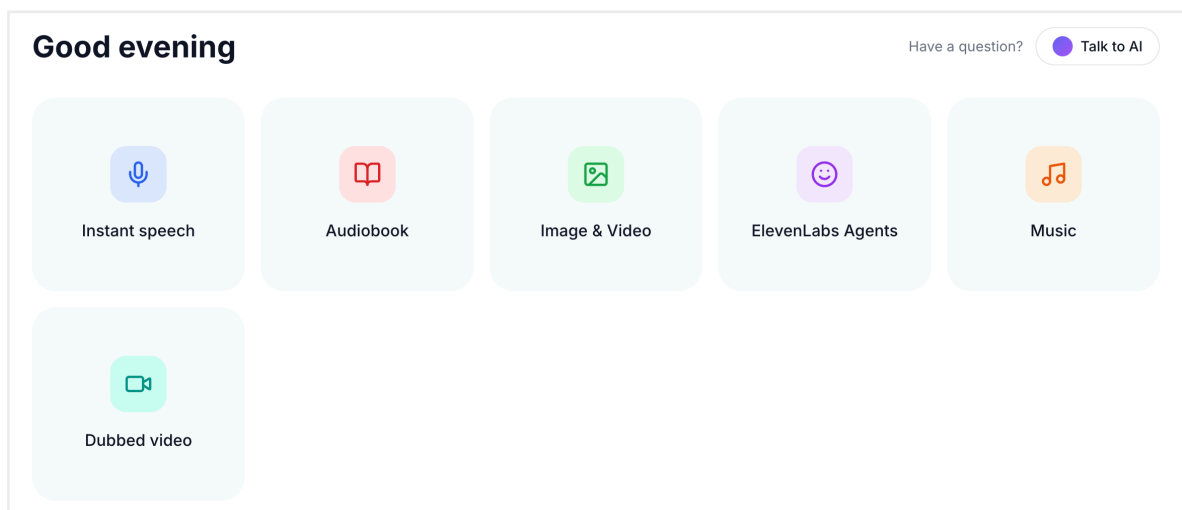

Remove this

Make this window in a way that it can collapse and come back - make ui same like YouTube

Make sure in the collapsed window major controls with names are still visible

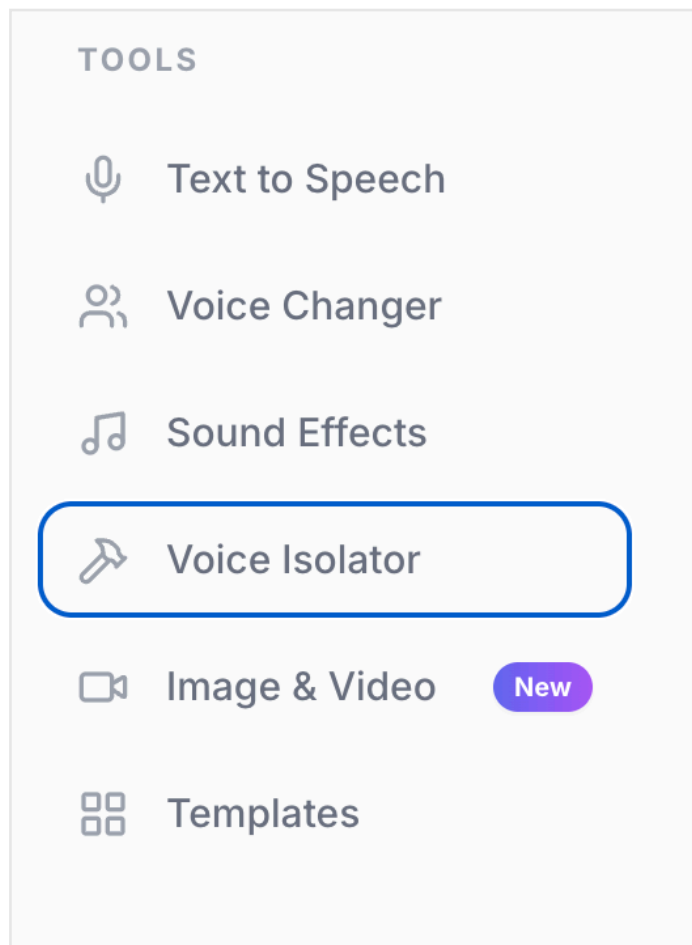

Max 4 buttons here  
Every button with headings  
Headings are as follows:

Text to Speech  
Voice to text

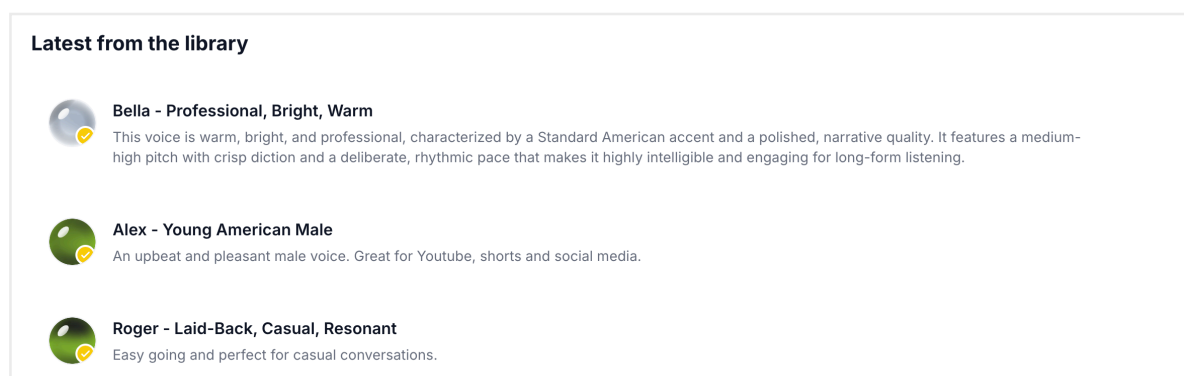

Voice changer (Coming soon)

Create Music (Coming soon)

Remove image video templates and isolator completely

Copy the buttons above in this side as well

In latest from library - show the last few generations that people have done

Create or clone a voice

**Voice Design**  
Design an entirely new voice from a text prompt

**Clone your Voice**  
Create a realistic digital clone of your voice

Remove this entire section

Keep this as it is - just your used voices will be at the top  
In the right side it has a lot of text clutter - make it into tables with columns for every category

Load more voices (2 remaining)

More voices - text change

 49,980

Generate 

Mention that the 49k number is credit in the following manner [ Credits left: ]  
In the generate button there will be only text no symbols as currently used

Start typing here or paste any text...

0 / 5,000

Font size in this text box to be reduce by 3 points  
Start typing here text needs to be darker and more visible

● 49,980

Generate ⌘↵

This same button will have credit left -> generate button -> character count

## SPEED

Slower

## STABILITY

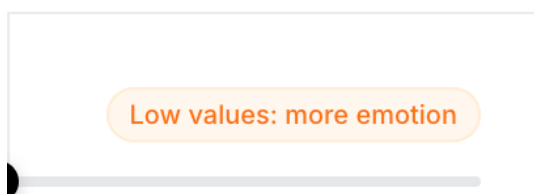

Variable

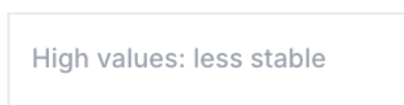

For all our controls we need to have descriptions when you over mouse over them - eleven labs sample is attached above

Text like slower faster - low high needs to be bigger and darker in colour

Remove this when you add hover text

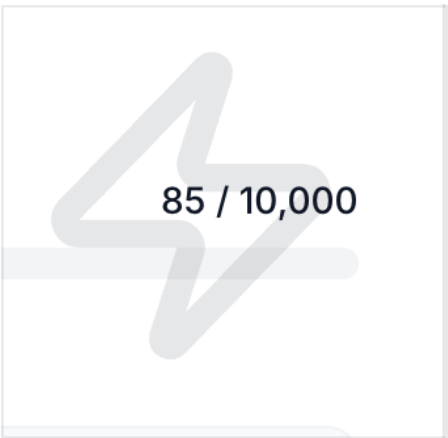

This too same

Language Override

English

Speech Pronunciation - change text to this and add hover description

Remove bijli icon
